

2020 readiness toolkit

Agile Online Course©

Online program

The program allows participants to get insights into how agile methodologies work and how they can be applied to their business for increased impact and better results. The specific objectives of the program can be set based on a deeper needs analysis.

The solution proposed – Agile Online Course©

In this course, we will present the Agile alphabet, we will showcase the modern needs and we will investigate the differentiators that force us to change into Agile. Moreover, we will discuss more complex and innovative subjects like Design Thinking – an innovative problem-solving mentality – together with Agile organisational setup and how to evolve the current hierarchical model.

This course is designed for people leading or participating in agile projects or agile teams as well as people interested to understand Agile better and investigate its benefits.

The Agile principles can be used in everyday work and can be combined with more classic project management methodologies, providing even more benefits to project managers, project members, managers and organisations.

Objectives

- Get an overview of basic Agile methodologies and their benefits
- Understand advanced Agile concepts

- Investigate already available tools and solutions

Agenda

- What are the shortcomings of traditional Project Management? Is traditional Project Management what you need nowadays?
- What are the Principles / Values / History of Agile?
