

Discovering Romanian[©]

Online programme

When living and working abroad, functional knowledge of the local language makes for a more pleasant, richer expatriation experience. This program helps foreigners who have recently moved to Romania and need to learn Romanian especially in a business context and to understand the new culture and society.

The solution proposed – Discovering Romanian®

This practical course helps participants communicate with their Romanian partners on a variety of topics and handle independently a range of interactions in Romanian. As a result, they can manage everyday work and life situations more effectively and get a deeper understanding of the cultural aspects that impact their expatriate experience.

The course covers the essential vocabulary and structures participants need to speak about present activities, past experiences and future plans. The learning approach is very interactive and visual, and activities focus on fluency, so participants can handle everyday situations such as getting around, ordering or shopping even from the first lessons.

Objectives

- develop **communication** – understanding, speaking, pronunciation
- develop the **basic vocabulary** they need to interact effectively with their colleagues, partners and clients
- develop **basic writing skills** – to understand short texts on concrete topics and write simple messages related to

business situations
